## UHL-43 Multi-Purpose UHD/HD Digital Camera

The UHL-43 is a 4K/HD Multi Purpose Camera that allows users to operate in HD while preparing for future 4K production. It is equipped with HD/3G-SDI formats as standard, and can be upgraded to a 4K/12G-SDI

camera with the purchase of a software license. Employing the same sensors as the UHK-430/435 “UNICAM XE” series cameras, the UHL-43 produces superb high quality images. In addition, due to its compact one-piece form factor, it is suitable for pan-tilt camera systems and monitoring cameras that shoot their subjects from various angles.

## New Sports 200 Heavy-duty Tripod Legs

The SPORT 200 offers an outstanding torsional rigidity and its innovative and new design aluminum profile angled and shaped to ensure maximum strength, holding up to 200 Kg (441 lbs) load while weighing only 10,5 kg (23 lbs).

A special attention has been devoted to materials of this HDT, enduring harsh weather conditions, rain, dust, moisture and extreme temperatures. The center brace drives a telescopic mid-level spreader for a truss structure stable in any environment.

Set up is fast and comfortable, each leg has an engraved second stage, positive rotary locking knobs and safety pins while the bubble level is located on the side of the platform.

The upper stage accepts classic Mitchell flat base heads and the 4 standard Vinten bolts. The feet incorporate a stainless steel spike for soft terrains and a pivoting rubber pad for flat surfaces.

## P70 Steering PEDESTALS

The STEERING P70 Pedestal is a new version of the bestselling P70, a portable and compact steering system for both studio applications with a super-smooth drive for easy travelling and OB applications.

Extremely stable, yet lightweight, the P70 delivers a superb performance with any camera/lens combinations up to 75 Kg (165 lbs).
